## Cancer Care Clinic Open in the Milan Ilich Pavilion

Cancer Care Clinic - Reception

Cancer Care Clinic - Patient exam room and treatment spaces

Richmond Hospital's relocation of the refurbished Cancer Care Clinic to the Milan Ilich Pavilion was completed end of November, signaling a major step towards the construction of the new acute care tower.

The upgraded Cancer Care Clinic prioritizes natural light conducive to a healing environment in addition to an increased number of exam rooms, care bays, and a conference room for education, research, and virtual care.

"My team and I are excited to welcome patients in our new clinic," shares Cheryl Luey, Oncology Nurse, Richmond Hospital. "Our clinic's expansion and its new design enable us to provide the best quality care to our patients as well as enhance their overall experience in Richmond."

The Cancer Care Clinic was previously located in the Rotunda, where demolition is due to commence.

## Medical Imaging Centre Campaign – We're 95% There!

“Growing up, I had always wanted to have superpowers,” shares Dr. Tracy Chandler, radiologist at Richmond Hospital. “And no matter how much I wished I could fly or become invisible, it just never happened. I could not lift off and I was always in plain sight. But years later, one superpower did eventually come true, and that was x-ray vision.”

“As a child, having x-ray vision meant you could see through walls and discover hidden treasures. You could see what was happening even in enclosed spaces, and you could take action to help people before anyone else could see there was a problem. Now, as a radiologist at Richmond Hospital, I am able to use medical imaging equipment to see into our patients, then help diagnose and treat them.”

“Our team looks forward to the new and expanded medical imaging centre coming in the Yurkovich Family Pavilion and thank all our donors for helping make it a reality.”

Dr. Tracy Chandler and Richmond Hospital radiologist team

Richmond Hospital Foundation is raising \$25 million to fund new and innovative technologies in the expanded, future Medical Imaging Centre which will be located in the Yurkovich Family Pavilion. Technologies such as the newest CT scanners, MRI machines, mammography machines, SPECT machines, X-Ray machines, and interventional radiology machines are key for diagnosing, tracking and monitoring medical conditions. Help us reach the finish line with your donation.

## Arrival of the New MRI Machine

Thanks to the Nanji family's generous donation, Richmond Hospital's new magnetic resonance imaging (MRI) machine arrived in January, replacing a 15-year old model. The new MRI machine officially began operations end of March.

Scan the QR code to watch how the new machine was placed into the hospital's MRI suite and hear from our radiologist, Dr. Tracy Chandler, on its features and how it benefits Richmond's community of care.

## 2023 Milestones Accomplished

- Early Childhood Mental Health, Noakes and Outpatient Pediatrics moved across the street to facilitate construction of the new tower
- Programs and services previously located in the Rotunda moved to the renovated fifth floor of the original hospital North Tower
- The Diabetes Education Centre moved to the Community Health Access Centre on Alderbridge Way
- Construction started on the interim Psychiatric Assessment Unit next to the Emergency Department

- Construction also started on the new UBC Faculty of Medicine Medical Education Centre next to the Milan Ilich Pavilion
- The IV Clinic moved to its new permanent location in the Milan Ilich Pavilion
- Relocated and upgraded Cancer Care Clinic opened its doors in the Milan Ilich Pavilion

See the redevelopment progress in video by scanning QR code

## Next to be Completed in 2024

- Psychiatric Assessment Unit and UBC Faculty of Medicine Medical Education Centre reopening in new locations
- Arrival of new CT scanner
- Demolition
